Amount budgeted: \$1,200,000 total; \$300,000 of which is for the land application portion

PowerPoint presentation:

Yes X No

Project summary statement:

The City's wastewater treatment plant produces approximately 8,000 wet tons of biosolids on a two-year cycle, which are used for agricultural application. ITB 2019-070 was awarded by council on September 4, 2019. It authorized two low bidders to receive biosolids for agronomic use. The two low bidders were Sno-Valley Farms Inc. and Elysian Fields LLC, both in Snohomish County.

Following Council award, crop conditions changed in Snohomish County, which means that the two low bidders may not be able to receive the biosolids in the previously expected quantities. Since the biosolids must be transported and applied this fall, staff is asking Council to award any remaining biosolids to the third low bidder, which is Tenelco Inc., located in Eastern Washington in Douglas County.
