Mr. Vaughn,

Your July 7, 2021 request for a noise variance has been granted. This is to allow installation of a side sewer connection along Evergreen Way. Normal weekday construction hours are 7 am–10 pm, 8am – 6 pm on weekends and holidays. To minimize traffic impacts during commute hours, this work must be performed at night. The variance allows nighttime work with the following restrictions:

- Vehicles with back-up alarms be routed to minimize backing
- Back-up alarms shall be directional broad band type alarms
- Tailgate slamming is prohibited
- Export haul must be loaded carefully to reduce impact noise
- A copy of this variance should be on-site during the work period

This variance will cover work in the vicinity of southbound Evergreen Way and SR526 may impact Everett residents. This will be valid during the construction window July 28-30, 2021 for up to 3 nights. The variance will be in effect on weekdays only.

Sincerely,

Megan Munro  
Noise Control Administrator
